Compare the seedlings in the four cups.

Features observed	Cup A	Cup B	Cup C	Cup D
Seed germinated (Yes/No)				
Height of Seedling (Tall/Medium/Short)/ No seedling				
Leaf colour (Green/Pale green/Yellow)/ No seedling				
Stem Condition (Strong/Weak)/No seedling				
Overall growth (Good/Fair/Poor)/No seedling				

Be a Plant Scientist

Look at your observations in the experiments done so far and tick (✓) the correct answer.

1. Which cup showed the best growth? A ☐ B ☐ C ☐ D ☐

2. What helped the seedling grow well?

   ☐ Only water ☐ Only soil

   ☐ Only sunlight ☐ Water, sunlight, air and soil

3. What happened when one condition was missing?

   ☐ The plant grew well. ☐ The plant did not grow.

   ☐ The plant grew to some extent.

From the observations, I infer that:

Conclusion: Plants need _____, _____, _____ and _____ to grow healthy and strong.
