Observe and Discuss

What special jobs do some stems do?

Stems grow underground to store food and help plants survive when there is not enough water, e.g., Ginger, Turmeric, Onion, Potato.

Observe the 'scale leaves' on ginger, turmeric and onion. Observe the 'eyes' on the potato.

Ginger

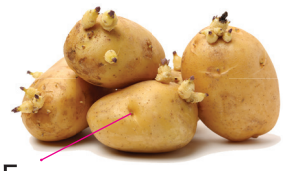

Turmeric

Onion

Potato

The potato is an underground stem. Its eyes grow into a new plant.

Do and Observe

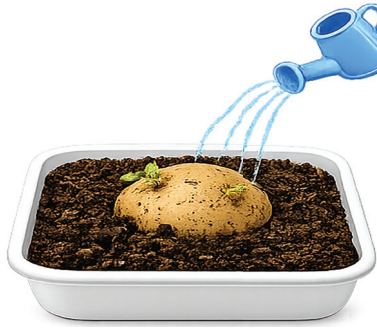

How does a potato sprout?

Take a potato with eyes.

Place it in soil.

Water it lightly.

Observe the sprouts.

1. A potato grows into a new plant from its..... Tick (✓)

   ◯ Leaves ◯ Eyes ◯ Flowers

2. The eyes of a potato are part of its..... Tick (✓)

   ◯ Root ◯ Stem ◯ Leaf

3. Does a potato grow from a seed? ◯ Yes ◯ No
