Let us Learn

Shall we learn to use the appropriate symbol (<,>, =) to compare the number of fruits in a fruit shop which are more or less?

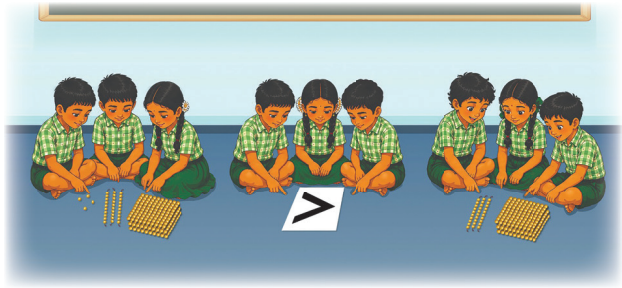

Number of oranges = **83**
Number of guavas = **90**

83 is less than 90
This is represented as **83 < 90.**

We can also say it as,
90 is more than 83
This is represented as **90 > 83.**

Let us Do

THB

Arrange the children in three groups. Ask the first two groups to pick and place the beads according to three digit numbers said by the teacher and the third group to compare both the collections and place appropriate symbols.

Let us Practise

Count the beads, write and place the appropriate symbol (>, <, =).
