Learning Journey

Uses energy-giving, body-building and protective foods to balance a meal.

Explains and values how food reaches our plate by describing the journey of rice and recognising the contribution of farmers and other helpers.

Classifies foods according to the edible parts of plants and identifies the ingredients used in common dishes.

Identifies and compares common trees, explains their ecological and cultural importance and practises an ethic of care for trees and other plants.

Identifies, compares and classifies root and stem modifications and plant adaptations based on their functions and habitats.

Explains the requirements for plant growth and the functions of plant parts through observation, recording and drawing inferences.
