Let us Do

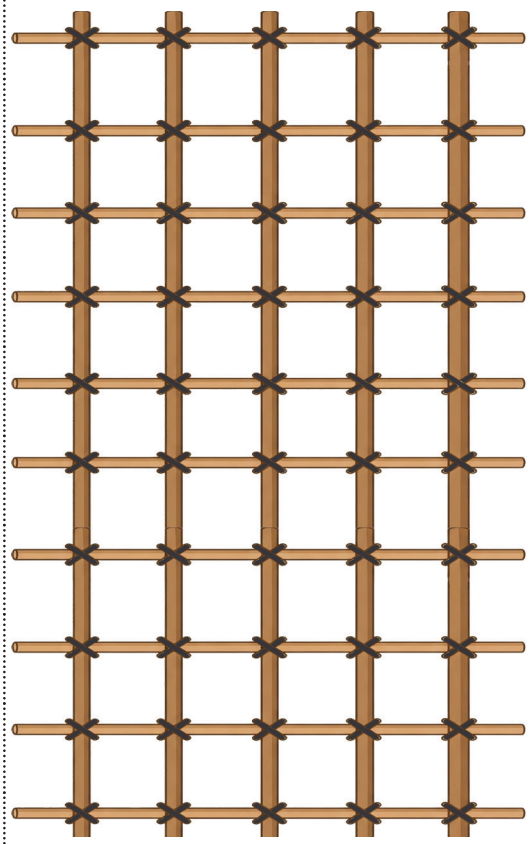

THB

Arrange the children in two groups. Ask one child in a group to arrange the 5 long sticks vertically first, then place the 10 short sticks (one at a time) horizontally as shown in the picture. Count the points where the sticks meet. Another child should write the corresponding multiplication tables on the blackboard, beginning with 1 × 5 = 5. Continue the activity to form the multiplication table of 5.

Let us Practise

Count the points where the sticks meet and form the multiplication table of 5.

Pictures	Number of times	Multiplication fact
	1 time 5 is 5	1 × 5 = 5
	2 times 5 is ——	
	3 times 5 is ——	
	4 times 5 is ——	
	5 times 5 is ——	
	6 times 5 is ——	
	7 times 5 is ——	
	8 times 5 is ——	
	9 times 5 is ——	
	10 times 5 is ——
