Uncomfortable but Needed!

Malar's Injection

Some touches make us uncomfortable and are painful but are needed - like Malar's injection.

Uncomfortable and Unsafe Touches!

Priya's Action

Avoid unsafe touches like pushing, pulling and pinching.

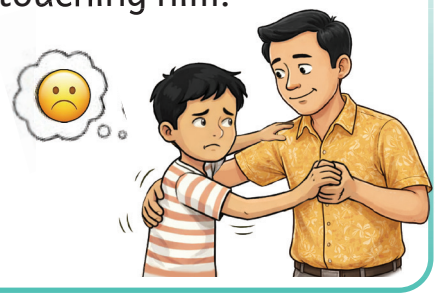

Balu's Experience

Some touches start as a safe touch.
They slowly become uncomfortable and unsafe. For example,

Balu's uncle taught him how to dance. In the beginning he felt happy.

As time went on, he did not like the way his uncle was touching him.

Knowing how we feel helps us to be safe.

Recognise the feelings.
Ask yourself,
"Is it comfortable?"
"Is it safe?"
If No,
Ask help from a trusted adult.
