Compare the adult with their young ones.

Dog

Puppy

Butterfly

Caterpillar

Hen

Chick

Ant

Larva

The young ones of insects are not similar to the adult.

Helpful and Harmful Insects

Try it at home.

Keep some uncovered food outside your home. Observe the insects that visit and list.

1. _____
2. _____
3. _____

Some insects like bees, butterflies and ants are helpful to us. Some insects like mosquitoes, houseflies, grasshopper, hair lice and cockroaches can cause harm.

Grasshopper - 'The Crop Eater'

- Grasshoppers live on and around plants.
- They eat leaves and often damage crops.

Dragonflies and earthworms are called 'Friends of Farmers' - Why?
