Let us Learn

Have you seen kilogram weight being used to measure vegetables and groceries in shops? Have you also seen goods weighing 1 kilogram packed and sold in packets?

Kilogram is the standard unit of weight used to measure the weight of objects throughout the world.

Find out and write the names of the things that are usually bought in 1 kilogram quantities in your house.

.....

.....

Let us Do

Ask the children to observe the objects available in the school. Let them guess which objects weigh more than 1 kilogram and which weigh less than 1 kilogram. Then, ask them to check their guesses by measuring the objects using a simple balance.

Let us Practise

Observe the objects and tick (✓) the correct one.

Object	More than 1 kilogram	Less than 1 kilogram
