# Preface

The Tamil Nadu State Education Policy (TNSEP) 2025 emphasises activity-based, play-oriented and experiential learning at the primary stage to ensure that children attain competency based learning.

## Unique elements to develop Math skills

**Let us Learn**

Connects lessons to everyday experience through stories and life situation

**Let us Do**

Helps children develop coordination and master new concepts by doing activities

**Let us Practise**

Strengthens foundational Math through games and activities

**Let us Explore**

Exhibits logical thinking

The class Three term 2 textbook is organised into two units. These units follow a spiral approach.

**Unit - 1**

- Handles numbers upto 999.
- Understand the properties of shapes.

**Unit - 2**

- Performs number operations up to 999
- Compares weight using standard measures

## Distinctive features of the textbook

**Holistic Learning**
Integrates art, motor skills, life skills and values

**Teacher's Handbook**
Scaffolds teachers with activity descriptions and additional inputs beyond the textbooks

**Digital Resources**
Provides children with experiental, self-paced and various learning styles

## Assessment and Remediation

The activities suggested in the textbook develop logical thinking, analytical skills, mathematical communication and 21st century skills through open-ended questions and exploration.

**Learning Check**

Provides scope at the end of each lesson to track the level of attainment of concepts

**I can Do**

Critical Learning Outcomes (CLOs) are measured through oral activities, written activities and projects

In the present technological era, the children get a lot of exposure through various platforms and social interactions. Besides, the textbook is one of the resources for developing basic numeracy skills in the children. Hence, teachers are expected to go for multiple resources for accessing to additional activities for reinforcement of content, strengthening the content through multiple assessment tools for the effective application of concepts in real life situations and for developing mathematical thinking among our children.
