Do and Observe

Investigation - 2

Do roots and stems help absorb and move water through the plant?

a. What do I need?

A glass of water, Red or blue ink, A Balsam or Leucas plant with roots and flowers.

b. What should I do?

1. Fill a glass with water.
2. Add a few drops of red / blue ink.
3. Place the roots of the plant in the coloured water and leave it overnight.
4. Next morning observe the stem, leaves and flowers carefully.

c. What do I see?

Where was the coloured water observed? Tick (✓)

i. Root only ☐

ii. Root and stem ☐

iii. Root, stem and leaves ☐

iv. Root, stem, leaves and flowers ☐

d. Inference

From this experiment, I infer that _____ absorb water and _____ help move it through the plant.

Try this at home!
