Special Jobs of Roots and Stems

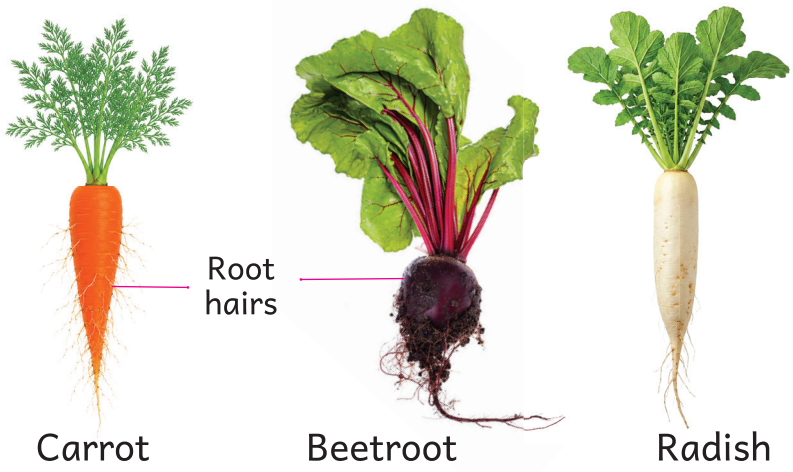

Observe and Discuss

In some plants, roots and stems do more than holding the plant and carrying water. Let us explore their special jobs.

What special jobs do some roots do?

In some plants, roots become thick and large as food is stored in them, e.g., Carrot, Beetroot, Radish.

Observe the 'fine root hairs' on these roots.

Do you Know?

The banyan tree has hanging roots that help support its big branches.

Do and Learn

Let us make a paper carrot.
