- We can move our neck, shoulders, ankles, wrists, hips and back joints up, down, sideways and around.
- We can bend and straighten our knees and elbows.

Do and Learn

1. Write how each joint moves.

WORD BANK Hip, Neck, Shoulder, Back, Knee, Wrist, Ankle, Elbow

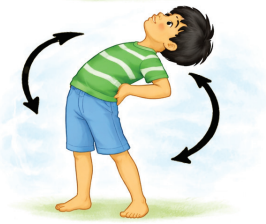

Movements	Joints
Up, Down, Sideways and Around	Neck _____ _____ _____ _____ _____ _____
Bend and Straighten	_____ _____

Back

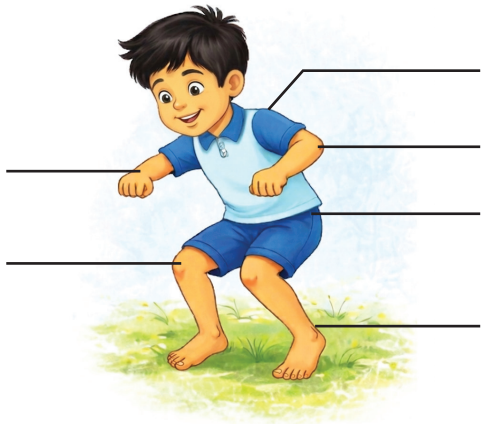

2. Name the joints.

Point and rotate and then bend your index finger. Is there any difference in the two movements?
