Active Ants

Observe and Discuss

How do ants live and work together?

Ants often move as a team, in a line, to find food.

Ants make nests under the soil and also live inside the barks of trees.

Ants eat sweets, seeds, small insects and food crumbs.

Male ant

Queen ant

Worker ants

An ant can carry objects weighing about 10-50 times its own weight.

There are three types of ants - male ant, queen ant and worker ant.

Ants live together in groups called colonies. Ants like to work as a team. They are very hardworking.

Ants help keep our soil clean and healthy.
