Observe and Discuss

What are insects?

Insects

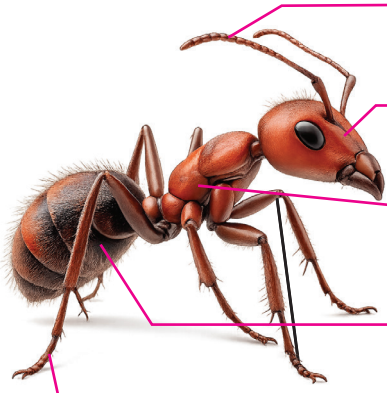

- Insects live on plants, under the soil, in water and in our homes.
- Ants, butterflies and bees are commonly seen insects.
- Insects are small animals with 6 legs, 4 wings and 2 feelers (antennae).
- They have 3 body parts - head, middle part (thorax) and back part (abdomen).
- Some insects have no wings - for example, head lice, bed bug.
- All small creatures are not insects! - for example, spider, millipede.

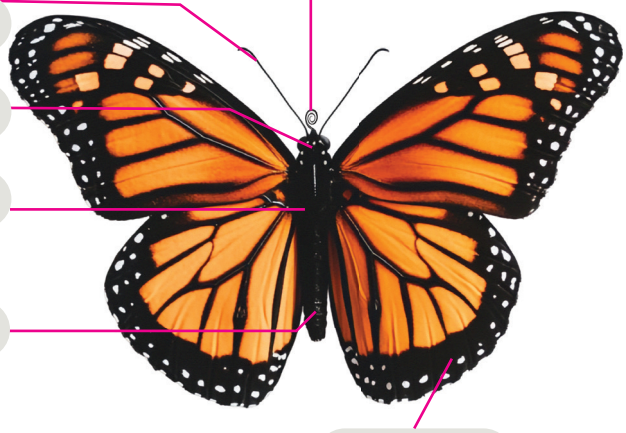

THB Help children understand that all small creatures are not insects.
