Life Cycle of Insects

Observe and Discuss

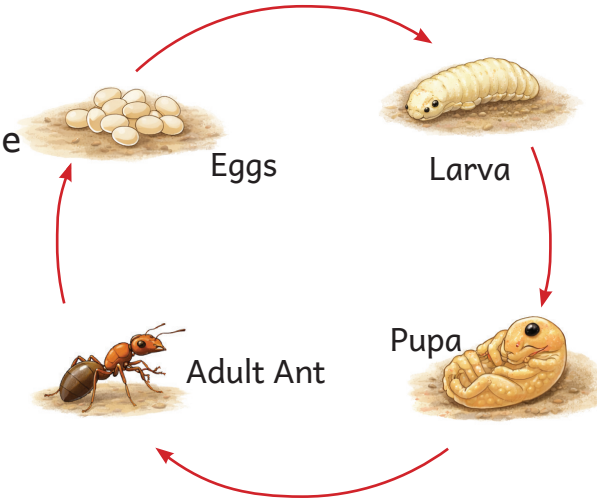

Life Cycle of an Ant

1 Eggs

The ant lays many tiny white eggs in the ant nest.

2 Larva

It is a soft, worm-like stage. It eats a lot and grows.

3 Pupa

The larva changes into a pupa inside a protective case.

4 Adult Ant

A fully grown ant comes out of the pupa.

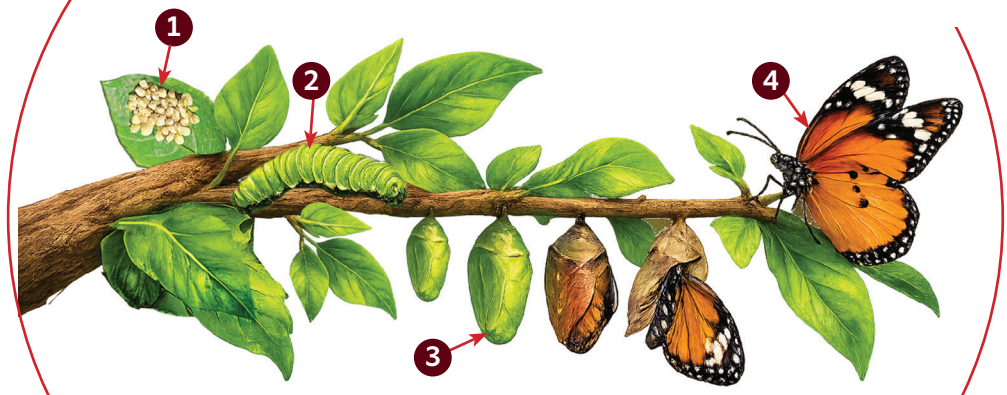

Life Cycle of a Butterfly

1 Egg stage

The butterfly lays tiny eggs on the underside of a leaf.

2 Caterpillar stage

The caterpillar (larva) comes out of the egg and eats leaves. It grows quickly.

4 Adult stage

A fully formed butterfly comes out of the pupa.

3 Pupa stage

The caterpillar changes into a pupa inside a protective case.
