Secret Jobs of Plant Parts

Observe and Discuss

One day, while Yazhini was running in a mango farm, a mango tree spoke with her.

Root

I take in water and hold the soil.

Stem

I move water and food through the plant.

Leaves

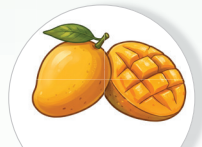

I make food for the plant.

Flower

I help make fruits and seeds.

Fruit

I protect seeds.

Plants prepare their own food and excess food is stored in roots, stems, fruits and seeds.
